

INDEX

- A**CTIVITY, physical, in rats, blood changes and, 695.
- Adrenal insufficiency and secondary shock, 581.
- , hypophysis in, 310.
- Adrenalectomy, capacity of muscle for work after, 65.
- Adrenine. *See* *Epinephrine*.
- , interaction of, and sympathetic impulses, 690.
- , sympathin and, comparative study of, 268.
- Afferents, specific reflex, 231.
- After-images and changes in respiratory gases, 620.
- Alcohol of body, so-called normal, 374.
- Alimentary motor conditioning and pitch discrimination, 323.
- Amino acids, intravenous, and gastric motility, 438.
- Anaphylaxis, extrahepatic biliary tract during, 430.
- Anoxemia in man, gastric activity and, 451.
- ANSON, B. J. *See* KABAT, ANSON, MAGOUN and RANSON, 214.
- Antidromic impulse and response of motoneurone, 595.
- Aortic and ventricular pressure curves, 130.
- ASHKENAZ, D. M. and E. A. SPIEGEL. The visceropannicular reflex, 573.
- Auditory discrimination in the cat, 1.
- B**AETJER, A. M. The diffusion of potassium from resting skeletal muscles following a reduction in the blood supply, 139.
- , The effect of potassium (and calcium) on the contractions of mammalian skeletal muscle, 147.
- BARNES, R. H. *See* MACKEY, BERGMAN and BARNES, 591.
- Barometric pressures, high, psychologic effects of, 554.
- BARTLEY, S. H. *See* FRY and BARTLEY, 414.
- BAZETT, H. C., L. B. LAPLACE and J. C. SCOTT. The pressure changes induced in the vascular system as the result of compression of a limb, and their effect on the indirect measurement of lateral pressures, 182.
- , *See* SUMWALT, ERR and BAZETT, 386.
- BEHNKE, A. R., R. M. THOMSON and E. P. MOTLEY. The psychologic effects from breathing air at 4 atmospheres pressure, 554.
- , *See* SHAW, BEHNKE, MESSER, THOMSON and MOTLEY, 545.
- BERGMAN, H. C. *See* MACKEY, BERGMAN and BARNES, 591.
- Bile, influence of, on absorption of oleic acid, 669.
- Biliary tract, extrahepatic, during anaphylaxis, 430.
- BISCHOFF, F. *See* MAXWELL and BISCHOFF, 172.
- BLAIR, H. A. The equation of the voltage-capacity curve for the excitation of the sciatic nerve of *Rana pipiens*, 277.
- Blood changes and physical activity in rats, 695.
- , during and after exercise, 202.
- , flow, coronary, phasic changes in, 627.
- , pressure, arterial, indirect estimation of, 182.
- , sugar, effect of lactogenic hormone on, 714.
- Body equilibration with pulmonary nitrogen, 545.
- BOWMAN, H., J. F. REGAN and E. U. STILL. The effect of intravenous injections of amino acids on the motility of the stomach in normal and fasting dogs, 438.

- BRACKETT, F. S. See HAMILTON and BRACKETT, 130.
- BROGDON, E. See HELLEBRANDT, BROGDON and HOOPES, 442, 451.
- BULLOCK, L. T., M. I. GREGERSEN and R. KINNEY. The use of hypertonic sucrose solution intravenously to reduce cerebrospinal fluid pressure without a secondary rise, 82.
- CALHOUN, J. A. See WILKINS, CALHOUN, PILCHER and REGEN, 477.
- Calorigenic action of fat and carbohydrate in pancreatic diabetes, 124.
- CANNON, W. B. and A. ROSENBLUETH. A comparative study of sympathin and adrenine, 268.
- See ROSENBLUETH and CANNON, 33.
- Capillaries, frog, permeability of, to protein, 401.
- Carbohydrate, calorigenic action of, in pancreatic diabetes, 124.
- changes and muscular contraction, 565.
- metabolism, hypophysis and, 493.
- utilization in aerobic muscular contraction, 294.
- Cardiac contraction, coronary occlusion and, 351.
- output, effect of posture and rest on, 705.
- Carotid sinuses, late effects of denervation of, 488.
- CATCHPOLE, H. R., H. H. COLE and P. B. PEARSON. Studies on the rate of disappearance and fate of mare gonadotropic hormone following intravenous injection, 21.
- CATTELL, McK. See FORBES, CATTELL and DAVIS, 152.
- Cerebellum in monkey, stimulation of interior of, 329.
- Cerebrospinal fluid pressure, hypertonic sucrose and, 82.
- , reducing power of, 97.
- CHAIKOFF, I. L., F. L. REICHERT, P. S. LARSON and M. E. MATHES. The effect of hypophysectomy and cerebral manipulation in the dog upon the response of the blood sugar and inorganic phosphorus to insulin, 493.
- Chimpanzee, upper limit of hearing in, 109.
- Chloride and sugar, metabolism of, hypothalamus and, 504.
- excretion, water and, of decerebrate cats, 386.
- Ciliated epithelium, neurogenous activation of, 468.
- CLARKE, M. F. and A. H. SMITH. Effect of a diet poor in salts upon the growth and composition of the incisors of the rat, 286.

AMERICAN JOURNAL
OF
PHYSIOLOGY

VOLUME 112

BALTIMORE, MD.
1935

CONTENTS

No. 1. MAY, 1935

Pitch and Intensity Discrimination by Cats. <i>Simon Duworkin</i>	1
Hexosemonophosphate Changes in Muscle in Relation to Rate of Stimulation and Work Performed. <i>Robert E. Fisher and Gerty T. Cori</i>	5
The Origin and Significance of Neutral Chloride in the Secretions of the Stomach and Duodenum. <i>Charles M. Wilhelmj, Leo C. Henrich, Irwin Neigus and Frederick C. Hill</i>	15
Studies on the Rate of Disappearance and Fate of Mare Gonadotropic Hormone Following Intravenous Injection. <i>H. R. Catchpole, H. H. Cole and P. B. Pearson</i>	21
Reserve Store of Hemoglobin Producing Substances in Growing Dogs as Influenced by Diet. <i>F. S. Robscheit-Robbins and G. H. Whipple</i>	27
The Chemical Mediation of Sympathetic Vasodilator Nerve Impulses. <i>A. Rosenblueth and W. B. Cannon</i>	33
Evidence for a Potassium Shift from Plasma to Muscles in Response to an Increased Carbon Dioxide Tension. <i>W. O. Fenn and Doris M. Cobb</i>	41
The Kinetics of the Elimination of the Dye Water Blue from Dog Plasma after Intravenous Injection. <i>A. Hemingway, F. H. Scott and H. N. Wright</i>	56
Time for Development of Incapacity to Work in Adrenalectomized Rats. <i>W. M. Hales, G. M. Haslerud and D. J. Ingle</i>	65
The Inactivation of Histamine in Perfused Organs. <i>Frederic R. Steggerda, Hiram E. Essex and Frank C. Mann</i>	70
Increased Susceptibility to Local Infection Following Blockage of Lymph Drainage. <i>Cecil K. Drinker, Madeleine E. Field, Hugh K. Ward and Champ Lyons</i>	74
The Use of Hypertonic Sucrose Solution Intravenously to Reduce Cerebrospinal Fluid Pressure Without a Secondary Rise. <i>L. T. Bullock, M. I. Gregersen and R. Kinney</i>	82
The Effect of Intravenous Injection of Sucrose and Glucose upon the Reducing Power of Cerebrospinal Fluid, Before and After Hydrolysis. <i>Magnus I. Gregersen and Lillian Wright</i>	97
The Upper Limit of Hearing in Chimpanzee. <i>J. H. Elder</i>	109
The Resynthesis of Phosphocreatine after Muscular Contraction. <i>Jacob Sacks and Wilma C. Sacks</i>	116
Calorigenic Action of Fat and Carbohydrate in Pancreatic Diabetes. <i>G. C. Ring</i>	124
Dynamic Considerations on the Relation Between Aortic and Ventricular Pressure Curves. <i>W. F. Hamilton and F. S. Brackett</i>	130
The Diffusion of Potassium from Resting Skeletal Muscles Following a Reduction in the Blood Supply. <i>A. M. Baetjer</i>	139
The Effect of Potassium (and Calcium) on the Contraction of Mammalian Skeletal Muscle. <i>A. M. Baetjer</i>	147
The Immediate Effect of Spinal Transection on the Crossed Extension Reflex. <i>Alexander Forbes, McKeen Cattell and Hallowell Davis</i>	152
The Relation Between the Motor and Secretory Functions of the Human Fasting Stomach. <i>Frances A. Hellebrandt</i>	162

The Relationship of the Extrinsic Renal Nerves to the Origin of Experimental Hypertension. <i>Irvine H. Page</i>	166
Augmentation of the Physiologic Response to Insulin. <i>L. C. Maxwell and Fritz Bischoff</i>	172
Sex-Drive in Rats. <i>James Rollin Slonaker</i>	176
The Pressure Changes Induced in the Vascular System as the Result of Compression of a Limb, and Their Effect on the Indirect Measurement of Lateral Pressures. <i>H. C. Bazett, L. B. Laplace and J. C. Scott</i>	182
The Erythrocyte and Hemoglobin Increase in Human Blood During and After Exercise. <i>Edward C. Schneider and C. B. Crampton</i>	202
Distribution of Vagus Control of the Turtle Heart. <i>Henry M. Lee</i>	207
Stimulation of the Hypothalamus with Special Reference to Its Effect on Gastro-Intestinal Motility. <i>H. Kabat, B. J. Anson, H. W. Magoun and S. W. Ranson</i>	214

No. 2. JUNE, 1935

Response of the Hyperthyroid Heart to Epinephrine. <i>C. H. McDonald, Walter Lee Shepard, M. F. Green and A. F. DeGroat</i>	227
A Study in Reflexes: Identification of the Cutaneous Afferent Fibers Which Evoke Ipsilateral Extensor and Flexor Reflexes. <i>A. Sidney Harris</i>	231
The Effect of Total Thyroidectomy Upon Experimental Diabetes Insipidus in Dogs. <i>William Mahoney and Donal Sheehan</i>	250
The Effects of Magnesium Deficiency on the Teeth and Their Supporting Structures in Rats. <i>Henry Klein, Elsa R. Orent and E. V. McCollum</i>	256
Growth and Glycogen Content of the Fetal Liver and Placenta. <i>E. L. Corey</i>	263
A Comparative Study of Sympathin and Adrenine. <i>W. B. Cannon and A. Rosenblueth</i>	268
The Equation of the Voltage-Capacity Curve for the Excitation of the Sciatic Nerve of <i>Rana Pipiens</i> . <i>H. A. Blair</i>	277
Effect of a Diet Poor in Salts Upon the Growth and Composition of the Incisors of the Rat. <i>Miriam F. Clarke and Arthur H. Smith</i>	286
The Utilization of Carbohydrate During Aerobic Activity in Isolated Frogs' Muscle. <i>C. L. Gemmill</i>	294
Evidences of an Altered Tissue State in Ventricular Fibrillation. <i>N. D. Kehar and D. R. Hooker</i>	301
Weight Loss Changes During Muscular Work Following Food Ingestion. <i>Carl Iver Howland</i>	307
The Role of the Hypophysis in Experimental Chronic Adrenal Insufficiency. <i>Arthur Grollman and W. M. Firor</i>	310
The Effect of Initial Tension on the Spontaneous Activity and Responses of the Non-Pregnant Cat's Uterus. <i>F. A. Simeone</i>	320
Alimentary Motor Conditioning and Pitch Discrimination in Dogs. <i>Simon Dworkin</i>	323
Electrical Stimulation of the Interior of the Cerebellum in the Monkey. <i>H. W. Magoun, W. K. Hare and S. W. Ranson</i>	329
The Quantitative Determination of Urinary Oestrin. <i>George Van S. Smith and O. Watkins Smith</i>	340
The Effect of Coronary Occlusion on Myocardial Contraction. <i>Robert Tennant and Carl J. Wiggers</i>	351
Phasic Variations in Peripheral Coronary Resistance and Their Determinants. <i>Donald E. Gregg, Harold D. Green and Carl J. Wiggers</i>	362

The So-Called Normal Alcohol of the Body. <i>R. N. Harger and Anna L. Goss</i>	374
Rates of Resorption in the Gall Bladder. Further Experiments with Methylene Blue on Rabbits. <i>Béla Halpert, Paul A. O'Connor and William R. Thompson</i>	383
The Water and Chloride Excretion of Decerebrate Cats. <i>Margaret Sumwalt, W. H. Erb and H. C. Bazett</i>	386
Studies on Water Metabolism in Normal and Hypophysectomized Frogs. <i>Mildred E. Jones and F. R. Steggerda</i>	397
The Permeability of Frog Capillaries to Protein. <i>Ruth E. Conklin</i>	401

No. 3. JULY, 1935

The Excretion of Inulin by the Dog. <i>James A. Shannon</i>	405
The Effect of One Border in the Visual Field upon the Threshold of Another. <i>Glenn A. Fry and S. Howard Bartley</i>	414
Reflex Responses of the Nictitating Membrane. <i>A. Rosenblueth and H. G. Schwartz</i>	422
The Extrahepatic Biliary Tract During Anaphylaxis. <i>Karl Deissler and George M. Higgins</i>	430
The Effect of Intravenous Injections of Amino Acids on the Motility of the Stomach in Normal and Fasting Dogs. <i>Harry Bowman, J. F. Regan and Eugene U. Still</i>	438
The Disappearance of Digestive Inhibition with the Repetition of Exercise. <i>Frances A. Hellerbrandt, Elizabeth Brogdon and Sara L. Hoopes</i>	442
The Effect of Acute Anoxemia on Hunger, Digestive Contractions and the Secretion of Hydrochloric Acid in Man. <i>Frances A. Hellerbrandt, Elizabeth Brogdon and Sara L. Hoopes</i>	451
Tonus Rhythm in the Isolated Gall Bladder and the Effect of Certain Drugs. <i>George M. Higgins, Karl Deissler and Frank C. Mann</i>	461
Neurogenous Activation of Ciliated Epithelium. <i>Alfred M. Lucas</i>	468
The Influence of Pituitary Growth Hormone on the Phosphatase Activity of Bone and Kidney. <i>Walter E. Wilkins, J. Alfred Calhoun, Cobb Pilcher and Eugene M. Regen</i>	477
The Primacy of Polyuria in Diabetes Insipidus. <i>Curt P. Richter</i>	481
Observations on the Late Effects of Denervation of the Carotid Sinuses and Section of the Depressor Nerves. <i>M. F. Green and A. De Groat</i>	488
The Effect of Hypophysectomy and Cerebral Manipulation in the Dog upon the Response of the Blood Sugar and Inorganic Phosphorus to Insulin. <i>I. L. Chaikoff, F. L. Reichert, P. S. Larson and M. E. Mathes</i>	493
Experiments on the Hypothalamic Nuclei in the Regulation of Chloride and Sugar Metabolism. <i>F. H. Lewy and F. K. Gassmann</i>	504
On the Existence of Pro-Secretin. <i>V. Brown Scott and Eugene U. Still</i>	511
The Influence of Hyperpnea and of Variations of O_2 - and CO_2 -Tension in the Inspired Air upon Hearing. <i>Ernst Gellhorn and Irwin G. Spiessman</i>	519
On the Renal Excretion of Urea. <i>R. Dominguez</i>	529
The Equilibrium Time of the Gaseous Nitrogen in the Dog's Body Following Changes of Nitrogen Tension in the Lungs. <i>Louis A. Shaw, Albert R. Behnke, Anne C. Messer, Robert M. Thomson and E. Preble Motley</i>	545
The Psychologic Effects from Breathing Air at 4 Atmospheres Pressure. <i>Albert R. Behnke, Robert M. Thomson and E. Preble Motley</i>	554
Observations on the Variation in Water Content of the Fecal Material Along the Colon. <i>F. R. Steggerda</i>	559

Carbohydrate Changes During Recovery from Muscular Contraction. <i>Jacob Sacks and Wilma C. Sacks</i>	565
---	-----

No. 4. AUGUST, 1935

The Viscero-Pannicular Reflex. <i>D. M. Ashkenaz and E. A. Spiegel</i>	573
The Substance in Human Seminal Fluid Affecting Uterine Muscle. <i>Jessie Reed Cockrill, Edgar G. Miller, Jr. and Raphael Kurzrok</i>	577
A Comparative Study of Sodium, Chloride and Blood Pressure Changes Induced by Adrenal Insufficiency, Trauma and Intraperitoneal Administration of Glucose. <i>W. M. Parkins, A. R. Taylor and W. W. Swingle</i>	581
A Comparison of the Influence of Fasting upon the Tolerance to Glucose and Galactose. <i>Eaton M. MacKay, H. C. Bergman and Richard H. Barnes</i>	591
The Effect of an Antidromic Impulse on the Response of the Motoneurone. <i>R. Lorente de Nó</i>	595
Determinations of Refractory Periods in the Turtle Heart. <i>A. S. Gilson, Jr.</i>	610
The Influence of Hyperpnea and of Variations of the O ₂ - and CO ₂ -Tension in the Inspired Air upon After-Images. <i>Ernst Gellhorn and Irwin G. Spiesman</i>	620
The Phasic Changes in Coronary Flow Established by Differential Pressure Curves. <i>Harold D. Green, Donald D. Gregg and Carl J. Wiggers</i>	627
The Peripheral Motor Sympathetic Innervation To and Within the Uterus. <i>Samuel R. M. Reynolds and Sanford Kaminester</i>	640
The Influence of Progressive Toxic Liver Damage upon the Dextrose Tolerance Curve. <i>Samuel Soskin and I. Arthur Mirsky</i>	649
Lymph Formation during Glandular Activity. <i>Octa C. Leigh</i>	657
The Influence of Hyperpnea and of Variations in the O ₂ and CO ₂ Tension in the Inspired Air upon Nystagmus. <i>Ernst Gellhorn and Irwin Spiesman</i>	662
The Influence of Sodium Taurocholate, Hepatic Bile and Gall-Bladder Bile upon the Absorption of Oleic Acid from the Small Intestine. <i>Cecilia Riegel, K. O'Shea Elsom and I. S. Ravdin</i>	669
Further Studies of the Effects of the Estrogenic and the Galactopoietic Hormones upon the Mammary Gland of the Rabbit. <i>W. U. Gardner, E. T. Gomez and C. W. Turner</i>	673
A Study of the Comparative Physiology of the Glossopharyngeal Nerve—Respiratory Reflex in the Rabbit, Cat and Dog. <i>Harry A. Teitelbaum and F. A. Ries</i>	684
The Coöperative Action of Sympathetic Nerve Impulses, Adrenine and Sympathin on the Nictitating Membrane of the Cat. <i>A. C. Liu</i>	690
Physical Activity and the Blood of Albino Rats. <i>Edward C. Schneider and C. B. Crampton</i>	695
The Carbon Dioxide Content and Combining Power and pH of Cervical Lymph. <i>J. William Heim and Octa C. Leigh</i>	699
Effect of Posture and Prolonged Rest on the Cardiac Output and Related Functions. <i>Sidney A. Gladstone</i>	705
The Effect of Lactogenic Hormone Preparations on the Blood Sugar Level of Rabbits and Monkeys. <i>W. O. Nelson, C. W. Turner and M. D. Oerholser</i>	714
Index.....	719

VOL. 112—No. 1

Issued May, 1935

BALTIMORE, U. S. A.

1935

THE AMERICAN JOURNAL OF PHYSIOLOGY

Editorial Policy. The Council has approved the following policy of management:

Manuscripts should be sent to the Managing Editor who will see that each paper is read by two or more members of the Editorial Board. Authors will then be advised as to the suitability of the paper or the desirability of any revision. The Editorial Board will be governed by certain general principles:

1. The suitability of papers will not be judged by arbitrary standards of length but on their content of significant new research results in physiology, presented with the greatest brevity which is compatible with scientific accuracy and clarity.

2. Preference will be given to papers from American Laboratories in the field of vertebrate physiology and to those which contribute to problems related to this field.

3. Subdivision of material coming out of a general research into two or more papers will be discouraged.

4. Papers restricted to the description of new apparatus or methods or which appear to be of the nature of progress reports, the publication of which might properly be withheld until the research has progressed to the completion of at least a significant phase of the problem, will not be accepted.

5. Papers giving confirmatory or negative results will be considered only if presented in the briefest possible space.

The following practical aspects are important in the preparation of papers:

a. Duplication of data in tables, charts and protocols is not believed to be generally necessary. Too extensive use of such material is likewise to be deprecated.

b. Tables and illustrative material should be prepared with the size of the Journal page ($4\frac{1}{2} \times 7\frac{1}{2}$ inches) in mind, specifically with the idea of conserving vertical space.

c. It is advantageous, when feasible, to group illustrations. This should be done with as little waste space between the several units as is possible and also with the idea of conserving vertical space.

d. Unless authors specify the desired reduction of their illustrations the printer will use his judgment in the matter.

e. Plotted curves and their guide-lines should be drawn in India ink on blue-lined coordinate paper.

f. All illustrative material must be submitted in such form as to admit of photographic reproduction without retouching, redrawing or the setting of marginal type.

g. Charts and graphic tracings which are larger than $8\frac{1}{2} \times 11$ inches, which may be injured in handling or which cannot be replaced, must be accompanied by photographs. These should be of the size desired in their publication.

h. References to cited papers should conform to the practice of the Quarterly Cumulative Index Medicus and should be in this order: Author's name, journal, volume (in Arabic), initial page, year.

The American Journal of Physiology is issued monthly by the American Physiological Society under the direction of the Council of the Society. From three to four volumes, each of about seven hundred and twenty pages, are published yearly. The subscription price per volume in the United States and Canada is \$7.50; in other countries, \$8.00.
